

Central Public Schools 2013-2014 Indoor Air Quality (IAQ) Annual Notification

Central Public Schools ISD #108 in coordination with the Minnesota Department of Education and the Environmental Protection Agency (EPA) have developed an indoor air quality management plan. A factor of the IAQ management plan is the following yearly correspondence to all district residents on the status of IAQ issues within the district.

Formal approval of the IAQ Management Plan by the ISD #108 School Board was conducted in the spring of 2003. Since that time the following IAQ related activities have occurred.

Spring 2007—HVAC upgrades conducted in boys and girls locker rooms and wrestling rooms.

Fall 2010, Fall 2014, Spring 2015—IAQ walkthrough of all buildings to identify problems associated with heating, ventilation and air conditioning (HVAC) components.

Fall 2010—Upgrades of all IAQ equipment at the elementary building.

Fall 2011-Upgrades of all HVAC/IAQ equipment at middle school building.

Fall 2012-Upgrades of all HVAC/IAQ equipment at high school building.

Throughout the upcoming year ISD #108 will continue to respond to IAQ concerns in a proactive manner to ensure the health and safety of students, staff and building visitors. If you have questions relating to IAQ or would like to review the district IAQ management plan, please feel free to contact the Buildings and Grounds Supervisor at 467-7008.
